| Visakhapatnam, India

Professional Summary

Computer Science undergraduate (B.Tech, expected graduation 2027; GATE 2026 qualified) with hands-on full-stack development experience and a strong networking foundation across CCNA Routing & Switching, Python, and AI/Data Science tracks. Passionate about networking, information technology, and computer science, with strong analytical and problem-solving skills built through independent full-stack projects and competitive programming (150+ LeetCode problems solved). Self-driven, able to multi-task, self-start, and work in a fast-paced team environment as well as independently; experienced in documenting processes and building repeatable workflows. Fluent in English (Verbal and Written).

Technical Skills

- **Networking:** CCNA Certified - Routing & Switching, TCP/IP, Subnetting, VLANs, Network Troubleshooting, Cisco Packet Tracer
- **Languages:** Java, JavaScript, Python, C, HTML5, CSS3
- **Frontend:** React.js, Angular.js, Responsive UI Design, Component-Based Architecture
- **Backend:** Node.js, Express.js, REST API Development, WebSockets, MVC Architecture
- **Databases:** MongoDB, SQL, Mongoose ODM
- **Security:** JWT Authentication, Role-Based Access Control (RBAC), Secure Credential Management
- **Tools & Platforms:** Git, GitHub, Agile Workflow, Render, Vercel, Capacitor
- **Concepts:** Full Stack Development, Scalable System Design, API Optimization, Modular Architecture

Certifications

- CCNA: Introduction to Networks
- CCNA: Switching, Routing, and Wireless Essentials
- CCNA: Enterprise Networking, Security, and Automation
- Cisco NetAcad: Python Essentials 1
- Cisco NetAcad: Python Essentials 2
- Cisco NetAcad: Introduction to Data Science
- Cisco NetAcad: Apply AI - Analyze Customer Reviews
- Cisco NetAcad: Introduction to Modern AI
- HackerRank: Node.js (Intermediate/Advanced)

Education

B.Tech - Computer Science and Engineering | 2023 - 2027 (Expected)

GITAM University, Visakhapatnam | CGPA: 8.27, SGPA: 9.42

Class X (CBSE) | 2021

Akshara School | 92.4%

Experience

Full Stack Developer (MERN) - Independent Projects | 2023 - Present

Remote

- Designed, built, and deployed 3+ production-grade full-stack applications using the MERN stack, collectively serving 150+ users across web and Android platforms.
- Architected REST APIs handling JWT authentication, role-based access control, real-time data processing, and core business logic for multi-user systems.
- Practiced agile development workflows - iterative sprints, GitHub-based version control, feature branching, and structured pull-request reviews.
- Applied analytical and problem-solving skills to troubleshoot and resolve technical issues across the stack, documenting fixes and processes for future reference.
- Applied UI/UX principles to design intuitive, responsive interfaces for diverse user roles, including administrators, security personnel, and students.
- Used open-source deployment infrastructure (Render, Vercel) with environment-based configuration and secure credential management.

Projects

GParking - Smart Campus Parking System | 2026

MERN Stack, JWT, REST APIs, Capacitor, QR Code

- Built a full-stack campus parking management platform featuring live parking occupancy, QR-based vehicle verification, and violation management for Admin, Security, and Student users.
- Designed secure REST APIs with JWT authentication and role-based access control (RBAC), enforcing authorization boundaries across all application endpoints.
- Architected a modular backend separating parking, user, and violation services, enabling independent feature

development and straightforward system expansion.

- Deployed the application on Render and packaged it into a cross-platform Android application using Capacitor, delivering web and mobile access from a single codebase.

Connectify - Real-Time Video Communication Platform | 2025

React, Node.js, WebRTC, Socket.io, REST APIs

- Built a real-time video conferencing platform using WebRTC for peer-to-peer media streaming and Socket.io for low-latency signalling and session synchronization.
- Engineered room-based session management with live messaging and participant presence tracking, enabling seamless collaboration across multiple users.
- Developed REST APIs for user and room management and implemented a responsive interface supporting desktop and mobile devices.
- Optimized connection setup and media exchange by integrating WebRTC signalling workflows with Socket.io, ensuring reliable real-time communication.

TalkGPT - AI-Powered Conversational Assistant | 2025

React, Node.js, Python, OpenAI API, REST APIs

- Developed a full-stack AI chat application integrating the OpenAI API through a Python backend to generate conversational responses from user prompts.
- Built REST APIs for prompt processing and conversation management, enabling reliable communication between the React frontend and AI service.
- Implemented streaming responses and a responsive chat interface, providing continuous message rendering and an interactive user experience.

RepoFlow - Distributed Version Control System | 2025

Node.js, File System APIs, CLI Design

- Architected a custom version-control system from scratch supporting commit tracking and multi-branch workflows, demonstrating a strong grasp of distributed-system design fundamentals.
- Built a CLI interface for streamlined repository operations; implemented file-monitoring for automated change detection and diff management.

SGPA Calculator - Desktop Application | 2025

Java, JavaFX, Capacitor, Android APK

- Developed a Java + JavaFX desktop application with dynamic grade inputs, real-time GPA computation, and a responsive UI.

Achievements & Recognition

- **GATE 2026 Qualified** - Computer Science & Information Technology (CSIT); national top-percentile placement among CS engineering candidates.
- **Top 10 Teams - GITAM GCGC Hackathon 2024** (out of 60+ teams): built a full-stack web + Android application addressing a real campus infrastructure problem under a 24-hour constraint; recognized in the Web Development + App Development domain.
- **LeetCode:** Solved 150+ algorithmic problems, demonstrating strong data structures and problem-solving proficiency.

Leadership & Positions of Responsibility

- **Crowd Management Head - EduYouth Meet 2024:** Led on-ground operations and attendee-facing real-time issue resolution for a 10,000+ attendee event; coordinated with multiple sub-teams on safety, traffic flow, and escalation handling.
- **Hospitality Lead - Homecoming 2024:** Managed end-to-end guest operations and customer-facing issue resolution for 300+ attendees; coordinated cross-functional teams on accommodation, logistics, and real-time problem-solving.

Core Competencies

- Strong analytical and problem-solving skills, with the ability to troubleshoot technical problems
- Passionate about networking, information technology, and computer science
- Knowledge of adjacent technologies, with Cisco Certifications (CCNA) and other industry-recognized certifications
- Ability to multi-task, self-start, and work in a fast-paced team environment, and the ability to work independently
- Customer-focused technical troubleshooting and real-time issue resolution
- Willing and able to travel to customer sites as required
- Fluent in English (Verbal and Written)
- Cross-functional and remote team collaboration
- Modular and scalable system design
- Process documentation and knowledge sharing
